

**Motorola 12 in Industrial Monochrome Monitor
Motorola DS3200-357A & DS3200-358A
Manufactured by Motorola and Display Tech
Dynamic Displays Replacement Model QES1510-045**

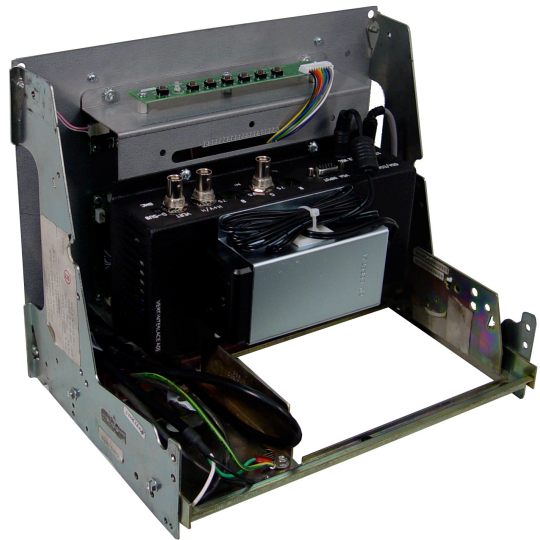

The Motorola DS3200 CRT Monitor Series are obsolete and have become very difficult to replace or to repair. Now you can upgrade your old Motorola DS3200-357A or DS3200-358A monitor with a new LCD monitor, model QES1510-045. Dynamic Displays model QES1510-045 is a drop in LCD replacement for the Motorola / Display Tech DS3200-357A and DS3200-358A - 12" Industrial Monochrome Monitor. This LCD unit is designed to be plug and play, and attaches to the existing mounting brackets of your obsolete CRT display. It is compatible with the legacy signal timing present in Allen Bradley 8400 CNC Controls and Interface Connectors.

The QES1510-045 is a cost-effective way to extend the useful life of your existing automation investment. Replace your old, low-performance CRT display unit with a new, affordable, quality replacement LCD Flat Panel display.
